## 1 SCOPE

The purpose of this document is to provide clear expectations to our suppliers that are in addition to what is normally required in an industry standard QMS and to state additional business requirements.

## 2 INTRODUCTION

This document is available at the latest revision on the UMBRAGROUP’s web portal under the “supplier” section. Every supplier when accepting a Contract/PO is responsible to verify and guarantee compliance to the latest revision of this document. A formal compliance commitment to comply with all requirements listed herein will be provided by the supplier to UMBRAGROUP by completing and submitting the Compliance Matrix (F-SQAR-001).

New revisions of this document shall be incorporated by the supplier within 3 months from the date of release.

Any exception shall be coordinated through the Compliance Matrix (F-SQAR-001) and approved in writing by UMBRAGROUP’s Supplier Quality prior to accepting the Contract/PO.

All written and oral communication with the supplier, including supplier specifications, procedures and reports, shall be in English.

## 3 LIST OF ACRONYMS

A&D - Aerospace & Defense  
APQP –Advanced Product Quality Planning  
CoC - Certificate of Conformance  
COTS - Commercial Off the Shelf  
ESD – Electrostatic Discharge  
FAI - First Article Inspection  
FIR – Final Inspection Report  
FMEA - Failure Mode Evaluation Analysis  
FOD – Foreign Object Damage  
MRB - Material Review Board  
NC- Nonconformance  
PFMEA - Process FMEA  
PO - Purchase Order  
PPAP - Production Part Approval Process  
QIP - Quality Improvement Plan  
QML - Qualified Manufacturers List  
QMS - Quality Management System

	<b>QMS PROCEDURE</b>	ID Doc: SQAR
		Rev.: 0
	<b>Supplier Quality Assurance Requirements</b>	Page: 7 of 30
		Date: 09/20/2023

#### 4 QUALITY MANAGEMENT SYSTEM REQUIREMENTS

The Supplier shall maintain a Quality Management System (QMS) suitable to the product and services provided to UMBRAGROUP. The supplier shall have at least a QMS certified in accordance with:

- ISO 9001 – Quality Management System Requirements

The QMS shall be certified by an accredited third-party certification body to the latest version of the standard.

In the absence of third-parties' certification, depending on the product, its application, value, and criticality, the UMBRAGROUP Quality representative may authorize the acceptance of other evidence of compliance. This may include second-party (UMBRA GROUP) audit or first-party (self) assessment to the applicable criteria above, or to a set of alternative basic quality requirements.

For suppliers providing nuclear power components to UMBRAGROUP they may choose to be registered to CSA N299.3 instead of ISO9001 and/or AS9100.

***For A&D orders Supplier is responsible for implementing, maintaining and demonstrating on-going compliance with the current revision of the applicable Quality Management System standards listed below:***

- i. ***Minimum QMS requirement for supplier that manufacture, assemble, and/or test products provided to UMBRAGROUP:***

***EN/AS9100 – “Quality Management Systems Requirements for Aviation, Space and Defense Organizations” certified by an accredited certification body in accordance with 9104-001 listed in on the IAQG OASIS database.***

***Note: ISO9001 is acceptable as minimum requirement for those suppliers that perform only single NC machining operations on UMBRAGROUP aerospace products starting from raw material provided by UMBRAGROUP and for which there is no involvement of their supply chain on UMBRAGROUP products.***

- ii. ***Minimum QMS requirement for suppliers that procure parts, materials and assemblies and resell these products to UMBRAGROUP. This includes organizations that procure products and split them into smaller quantities including those that coordinate a customer-controlled service on the product Quality Management System:***

***EN/AS9120 – “Quality Management System Requirements for Aviation, Space and Defence Distributors” certified by an accredited certification body in accordance with 9104-001 and listed on the SAE OASIS database.***

- iii. ***Minimum QMS requirement for suppliers that provide Special Processes:***

***Special processes supplier shall establish, document and maintain a system compliant with the standard EN/AS9100 or PRI/Nadcap AC7004.***

- iv. ***Minimum QMS requirement for suppliers that provide airborne software to UMBRAGROUP:***

***RTCA/DO-178, AS9006 and Software Engineering Institute (SEI) Capability Maturity Model (CMM) guidelines of level 3***

- v. ***Minimum QMS requirement for calibration laboratories or suppliers that provide measuring services to UMBRAGROUP:***

***The supplier shall establish, document and maintain a system that complies with the applicable version of ISO 17025 or ISO 10012 (Requirements for Measurements processes and Measuring Equipment). The supplier’s calibrations system is subject to audit, verification and approval and/or disapproval by UMBRAGROUP or its representative.***

- vi. ***Minimum QMS requirement for Commercial Off-The Shelf Suppliers (COTS):***

***ISO 9001 is accepted as minimum standard.***

	<b>QMS PROCEDURE</b>	ID Doc: <b>SQAR</b>
		Rev.: <b>0</b>
	<b>Supplier Quality Assurance Requirements</b>	Page: <b>8 of 30</b>
		Date: <b>09/20/2023</b>

*The supplier's Quality Management System is subject to audit, verification, approval and/or disapproval by UMBRAGROUP or its representative(s) **including UMBRAGROUP customers and regulatory agencies.***

Suppliers may at their option, and at no additional cost to UMBRAGROUP, elect to establish, implement and maintain a QMS or procedures that meet higher-level requirements than those specified by UMBRAGROUP.

Audit of the supplier's Quality Management System by UMBRAGROUP, its representative, their agents, and/or by a recognized third-party certification body at the supplier's facilities or of the supplier's sub-tier sources, does not relieve the supplier of the responsibility to furnish products or services that conform to all contract requirements.

Supplier shall immediately notify UMBRAGROUP upon loss of certification.

Upon receipt of an UMBRAGROUP contract, the supplier is responsible for implementing, maintaining and demonstrating on going compliance with the applicable Quality Management System requirements mentioned above, unless otherwise specified in the contract.

**For suppliers holding an IAQG (EN/AS/JISQ) 9100 series certification, the Supplier shall:**

- **Grant access to UMBRAGROUP to all private data available in OASIS database containing detailed certification related information,**
- **Provide UMBRAGROUP on request with any information about the content of the OASIS report and all private data available in OASIS. When the OASIS report or associated "Non-Conformities" are not in English, it is the responsibility of the Supplier to translate and submit necessary information in English.**
  - **The Supplier shall inform UMBRAGROUP in case of suspension, withdrawal or expiration of its QMS certification.**
  - **The Supplier shall notify to UMBRAGROUP any major change to the QMS (e.g., scope change).**

**9100 series means: 9100 (Aviation, Space and Defense Organizations), 9110 (Aviation Maintenance Organizations) and 9120 (Aviation, Space and Defense Distributors).**

	<b>QMS PROCEDURE</b>	ID Doc:    SQAR
		Rev.:        0
	<b>Supplier Quality Assurance Requirements</b>	Page:       9 of 30
		Date:        09/20/2023

## 5 GENERAL REQUIREMENTS

### 5.1 COMPLIANCE TO CONTRACTUAL REQUIREMENTS

Upon accepting a UMBRAGROUP contract, the Supplier is responsible for compliance to all contract requirements. All documents, drawings and specifications, regardless of origin, are applicable to the Supplier when specified in the contract/PO or documents referenced in the contract/PO and are required to be used at all levels of the supply chain. Unless otherwise specified in the contract/PO, the revisions active at the date of issue of the PO applies. Neither audit, surveillance, inspection or tests made by UMBRAGROUP, its representatives or its customers at Supplier's facilities, at any sub-tier facilities, or upon receipt at UMBRAGROUP, relieves the Supplier of the responsibility to furnish acceptable products or services that conform to all contract requirements; nor does it preclude subsequent rejection by UMBRAGROUP or its customers.

### 5.2 FOREIGN OBJECT DAMAGE/DEBRIS PREVENTION (FOD)

***Suppliers shall implement a FOD Prevention Program having a suitable level of FOD prevention for their individual products/services based on the guideline provided by NAS412 and/or AS9146 or similar recognized aerospace standard. Additional valid guidelines on how to develop a FOD prevention program can be found on the Supply Chain Management Handbook (SCMH) on the IAQG website.***

### 5.3 RIGHT OF ACCESS

UMBRA GROUP and its customers or their authorized representatives, including representatives of the regulatory agencies, shall be granted access to Supplier's facilities and to all Supplier's sub-tier facilities and shall be entitled to enter such facilities at any reasonable time during Supplier's normal operating hours provided that UMBRAGROUP will notify the Supplier with reasonable advance about the visit.

Supplier shall grant access to its facility with the aim to allow inspection of the Work In Process, to monitor compliance of the actual Supplier's production process to the applicable UMBRAGROUP requirements and specifications - as contained in UMBRAGROUP Purchase Orders - and to conduct tests of processes or materials and verification of quality system procedures and processes.

### 5.4 RECORD RETENTION

**The supplier shall retain all purchasing, production control, quality, manufacturing and manufacturing methods, test, and other related documents associated with the item purchased, for a minimum of 11 years or for the Life of Product (50 years) for parts designated as "Safety Critical" 1A or Important 1B, after order completion. These records shall provide evidence of conformity to requirements and to the effective operation of the supplier's QMS. Upon request, the Supplier shall be capable of retrieving and delivering required documents to UMBRAGROUP within 2 (two) working days from UMBRAGROUP's request at no expense for UMBRAGROUP.**

### 5.5 UMBRAGROUP'S DESIGNATED SOURCES FOR SPECIAL PROCESSES

Note: Special processes are those included in the PRI NADCAP families of special processes (see PRI NADCAP Families at [www.sae.org](http://www.sae.org))

***Special Processes shall be in accordance with specification(s) and standards stated on the drawing and or Purchase Order and shall be performed by qualified/authorized processors as follow:***

- 1) When the process specification/standard called out by the drawing/PO is an international industry and/or military standard (AMS, ASTM, MIL, EN, etc..) the processor must hold a valid and current certification from NADCAP for each process being performed to be approved for processing UMBRAGROUP's parts. Processors must have completed their NADCAP certification process: suppliers who are working on NADCAP***

	<b>QMS PROCEDURE</b>	ID Doc:    SQAR
		Rev.:        0
	<b>Supplier Quality Assurance Requirements</b>	Page:       10 of 30
		Date:        09/20/2023

*or are waiting on final approval will not be used until they are listed on NADCAP QML (see <https://www.eauditnet.com/eauditnet/ean/qml>).*

- 2) *When the process specification/standard called out by the drawing/PO is an internal UMBRAGROUP specification the Supplier shall only use special process sources that are approved by UMBRAGROUP and listed on UMBRAGROUP Approved Suppliers List (ASL).*
- 3) *Finally, when the process specification/standard called out by the drawing/PO is an UMBRAGROUP's customer specification, the Supplier shall only use special process sources that are approved by UMBRAGROUP's customer and listed on UMBRAGROUP's customer Approved Process Suppliers List (APSL)*

**Questions regarding approved Special Process Suppliers should be directed to the applicable UMBRAGROUP Procurement Agent.**

**The supplier shall provide certification of all special processes performed. All certifications must reflect the current governing document revision level.**

**The supplier shall include these requirements (flow-down) on contracts/PO, to its sub-tier sources.**

#### **5.6 COUNTERFEIT PARTS PREVENTION**

For finished and semi-finished products containing electrical, electronic and electro-mechanical components, and for all raw materials and fasteners used on UMBRAGROUP products, the Supplier shall implement actions to prevent the inadvertent use of counterfeit parts and materials. In particular:

- Purchase raw material, electrical, electronic and electro-mechanical parts only from Original Component Manufacturer (OCM) / Original Equipment Manufacturer (OEM) or their franchised dealer or an authorized distributor chain.
- Alternatively, the Supplier may use distributors with a quality management system approved in accordance with the standard AS/EN 9120 from a third party accredited certification body, listed in OASIS. Moreover, the distributors shall implement respectively the requirements of the standards AS/EN5553 (electrical, electronic and electro-mechanical parts) and/or AS/EN6174 (raw material).
- Parts shall not be used or reclaimed and misrepresented as new.
- Parts shall not be acquired from independent distributors or brokers unless specifically authorized in writing by UMBRAGROUP buyer.
- Supplier shall flow down all these requirements to its own supply chain.

#### **5.7 CONTROL OF SUB-TIER SUPPLIERS**

The Supplier, as the recipient of the contract, is responsible for meeting all requirements, including work performed by the Supplier's sub-tier Suppliers (also known as Sub-Suppliers or subcontract Suppliers). When the Supplier uses sub-tier sources to perform work on products and/or services scheduled for delivery to UMBRAGROUP, the Supplier shall include (flow-down) on contracts, to its sub-tier sources, all of the applicable technical and quality requirements contained in this document and UMBRAGROUP contract/PO (including: quality system requirement, raw material traceability requirements, regulatory requirements, the use of UMBRAGROUP designated sources, the requirement to document and control "key characteristics" and/or "key processes", to furnish certifications and test reports as required, record retention requirements and prohibited practices).

#### **5.8 ACCEPTANCE AUTHORITY MEDIA & USE OF ELECTRONIC/BIOMETRIC SIGNATURES**

The following rules apply and may be subjected to review by UMBRAGROUP at Suppliers facilities when electronic and/or biometric signatures are used by the supplier:

- The issue of electronic documents and application of electronic signatures must be under the direct control of the individual whose name appears on the electronic document.

	<b>QMS PROCEDURE</b>	ID Doc: <b>SQAR</b>
		Rev.: <b>0</b>
	<b>Supplier Quality Assurance Requirements</b>	Page: <b>11 of 30</b>
		Date: <b>09/20/2023</b>

- The application for electronic signature certifies that the signature (individual) represents an authorized company official.

*The use of electronic forms and signatures must be described in and governed by Supplier's documented procedures.*

**5.9 PROHIBITED PRACTICES**

The following acts and practices are prohibited, unless approved by UMBRAGROUP in writing. Any violation by the supplier may result in disqualification of the supplier for future business with UMBRAGROUP. In addition, the supplier shall invoke (flow-down) the requirements from sections 5.9.1 through 5.9.4 to all of the supplier's sub-tier sources performing work for the supplier that is scheduled for delivery to UMBRAGROUP on the contract.

**5.9.1 Unauthorized facility changes**

During performance on the contract, the supplier shall give to UMBRAGROUP written notice before relocating any production, inspection or processing facilities; or, transferring work between different facilities; or, when applicable, prior to initiating any changes in the source of major components procured by the supplier and designated for use in or for installation on products scheduled for delivery to UMBRAGROUP; or, making any other changes which may affect product quality, reliability or integrity. Such changes are subject to approval/disapproval by UMBRAGROUP. A change in ownership or a change in the individual designated as the management representative with respect to the supplier's Quality/Inspection System shall be considered as a facility change and requires the supplier to notify UMBRAGROUP.

**5.9.2 Unauthorized product repairs & salvage**

The supplier may not perform any repairs such as welding, brazing, soldering, plugging, peening, bushing, or, use of paints, adhesives or plating, or use any standard or other repair practice or method, on products damaged or found to be discrepant during fabrication or processing, or, on defects in castings or forgings, unless such repairs are specifically permitted by the applicable drawing or specification, or are specifically authorized by UMBRAGROUP in writing for each occurrence. In those cases, where UMBRAGROUP authorized product repair or salvage, the supplier shall include reference in the CoC of the applicable concession requests.

**5.9.3 Use of non-conventional manufacturing methods**

Unless required by the drawing, specification, or contract, the supplier may not use Electrical Discharge Machining (EDM), Electro Chemical Machining (ECM), laser or abrasive water jet cutting or drilling, flame spray coatings, or any other nonconventional manufacturing method or process on products scheduled for delivery to UMBRAGROUP without prior written authorization by UMBRAGROUP. This prohibition also applies to the use of such processes by the supplier's sub-tier sources. Authorization by UMBRAGROUP may be contingent on UMBRAGROUP conducting a review and approving the method, facilities, equipment and qualified personnel at the supplier's facilities or the facilities of the supplier's sub-tier sources that will perform the operation or process. In addition, when authorized, such operations and processes may only be performed by UMBRAGROUP approved sources.

**5.9.4 Altering data on documents**

The use of any method that causes the original data on documents to be obliterated and unreadable (i.e. the use of correction fluids, correction tape, write over, or other methods) to correct, modify or otherwise alter the data and/or entries on any certifications, test reports or other documents required by the contract, is strictly prohibited. Corrections may be made, providing it is clearly obvious that a correction was made, and it is signed (initialed) or stamped by an authorized individual. Upon receipt at UMBRAGROUP, products or services represented by documents that show evidence that they have been corrected or altered in an unauthorized manner are subject to rejection at supplier's expense.

**5.10 CONTROL OF UMBRAGROUP PROPERTY**

Supplier shall perform the following when UMBRAGROUP furnishes Raw material, semi-finished products and tools/gages:

	<b>QMS PROCEDURE</b>	ID Doc: <b>SQAR</b>
		Rev.: <b>0</b>
	<b>Supplier Quality Assurance Requirements</b>	Page: <b>12 of 30</b>
		Date: <b>09/20/2023</b>

- 1) Inspected upon receipt for evidence of UMBRAGROUP acceptance, shipping damage and lot/tool identification.  
In the event the Supplier determined parts delivered from UMBRAGROUP are not free of damage at the time of arrival, Supplier must notify the Buyer, and are not to begin processing of parts without prior approval from UMBRAGROUP.
- 2) Material traceability shall be maintained throughout the manufacturing process, assuring that items manufactured by the Supplier are identifiable to the material lot number provided by UMBRAGROUP. Supplier must ensure that a statement is included on the shipment certification and/or shipper identifying "UMBRA GROUP Supplied Material".
- 3) For tools/gages only, provide adequate protection to preclude damage or deterioration during use, handling and provide periodic calibration of gaging in accordance with UMBRAGROUP instructions, or request UMBRAGROUP to perform calibration at least 30 days prior to the expiration date shown by the calibration status. When deficiencies occur, notify the UMBRAGROUP Buyer immediately.
- 4) For tool/gages only assure completeness, presence of operating instructions and a valid calibration status, as applicable.
- 5) Support UMBRAGROUP periodic audits of UMBRAGROUP furnished tools/gages.

In this case, the Supplier shall stock the raw material supplied by UMBRAGROUP this must be done in compliance with the requisites below:

- Raw material shall remain an UMBRAGROUP property and shall be directly identified as such at the supplier's facility.
- Material shall be used only for UMBRAGROUP products.
- Material shall be stocked in a dedicated and separated area where is not possible to mix UMBRAGROUP's material with other customer's material.
- For the whole period of stocking in Supplier's facility the material must be identified with UMBRAGROUP's parameters (casting lot, material code, etc...). Supplier may add additional internal identification without removing the UMBRAGROUP identification.
- ***Each bar/plate/etc. and/or part of it shall be always easily and immediately linked to the original UMBRAGROUP lot. Material not properly identified shall be scrapped.***
- ***Material found without identification during an audit and/or inspection by UMBRAGROUP will cause a MAJOR finding and the discard of the material at supplier's cost.***

	<b>Supplier Quality Assurance Requirements</b>	Page: 13 of 30
		Date: 09/20/2023

## 6 PRODUCT QUALIFICATION

### 6.1 FIRST ARTICLE INSPECTION (FAI)

*Supplier shall perform First Article Inspections (FAI) in accordance with AS/EN9102, "Aerospace First Article Inspection Requirement", unless otherwise required by contract.*

*The first article item shall be clearly identified by a tag attached to the item or a label applied to the bag, and a copy of the FAI shall accompany the First Article part. UMBRAGROUP reserves the right to verify any or all the characteristics documented on the FAI report at the Supplier's facility.*

*UMBRA GROUP reserves the right to conduct surveillance of the Supplier's FAI and FAI process.*

*The FAI process must be described in and governed by Supplier's documented procedures.*

### 6.2 PRODUCTION PART APPROVAL (PPAP)

When specified on the contract, the Supplier shall submit to UMBRAGROUP a more comprehensive Production Part Approval Process (PPAP) qualification package (in accordance with AS9145 for aerospace products). Supplier shall use the PPAP guidelines provided by UMBRAGROUP upon request.

### 6.3 FINAL INSPECTION REPORT (FIR)

*Where specifically required by the drawing or Purchase Order and prior to delivery of products to UMBRAGROUP, the supplier shall perform final inspection on all products and document the results on a FIR. The format of the FIR is optional; however, it shall show the actual inspection results obtained, versus the drawing or specification requirements. FIR shall be delivered together with the part's CoC.*

*The supplier shall maintain the completed FIR as part of the supplier's quality records. Upon request, the FIR will be made available to UMBRAGROUP, UMBRAGROUP's customers or regulatory agencies for review.*

### 6.4 SAFETY CRITICAL PARTS

*Parts or products that are designated as critical or safety critical by the drawing shall follow the product qualification process as defined by MEP8.2.0001 (applicable to UMBRAGROUP Linear Motion LLC only)*

	<b>QMS PROCEDURE</b>	ID Doc: <b>SQAR</b>
		Rev.: <b>0</b>
	<b>Supplier Quality Assurance Requirements</b>	Page: <b>14 of 30</b>
		Date: <b>09/20/2023</b>

## 7 PROCESS CONTROL

This section defines the basic necessities for Suppliers to control their manufacturing process.

### 7.1 KEY CHARACTERISTIC

***The Suppliers variation management program shall be in compliance with requirements of EN/AS9103.***

When specified on the purchase order, or defined on the Engineering Drawing, the Supplier and all sub-tier contractors shall inspect all key characteristics 100% and provide the recorded data.

### 7.2 CONTROL OF MONITORING AND MEASURING DEVICES

The Supplier shall determine the monitoring and measurement to be undertaken and the monitoring and measuring devices needed to provide evidence of conformity of product to determined requirements. As a minimum, where necessary to ensure valid results, measuring equipment shall:

- a. Be calibrated or verified at specific intervals, or prior to use, against measurement standards traceable to international or national measurements standards; where no such standards exist, the basis used for calibration or verification shall be recorded; and
- b. Be identified to enable the calibration status to be immediately determined by the user.

***Unless otherwise specified by contract, the Supplier shall establish procedures to control Measuring and Test Equipment (M&TE) that are in compliance with the requirements of ISO 10012, ISO 17025 or equivalent industry standard.***

The supplier shall notify UMBRAGROUP in the event that measurement equipment is found significantly out-of-tolerance and the cognizant quality personnel shall appraise the impact on product quality already delivered.

When UMBRAGROUP furnishes tools/gages, they are assigned to a specific PO/order. The tools/gages must be returned with the order they are assigned to unless advised otherwise directly by UMBRAGROUP. The supplier assumes responsibility for the following:

- Validating calibration status, as applicable.
- Provide adequate protection to preclude damage or deterioration.
- Provide periodic calibration or request UMBRAGROUP perform calibration at least 30 days prior to expiration date.

### 7.3 PRODUCT INSPECTION REQUIREMENTS

#### 7.3.1 Inspection and Control System

Any inspection performed by the Supplier shall be performed by competent inspection personnel.

**The supplier must show that the product was tested at all stages of the process, must identify the name of the official who certified the results (e.g. with stamps, signature, etc.) and where applicable must include inspection test results.**

**Evidence of such inspections may be subject to review and auditing by UMBRAGROUP Quality Assurance.**

**The Supplier must receive approval from UMBRAGROUP when it uses sub-supplier for inspecting UMBRAGROUP products/services.**

If the drawing does not specifically call out a geometric tolerance for a specific drawing feature, the supplier shall apply the criteria given in the standard ISO 2768-2 "Geometrical tolerances for features without individual tolerance indications".

	<b>QMS PROCEDURE</b>	ID Doc: SQAR
		Rev.: 0
	<b>Supplier Quality Assurance Requirements</b>	Page: 15 of 30
		Date: 09/20/2023

### 7.3.2 Sampling Inspection

The Supplier is responsible for 100% verified quality for all items delivered to UMBRAGROUP: **shall perform 100% inspection of all features of the drawing on all products delivered to UMBRAGROUP.**

**When the Supplier elects to use statistical methods for acceptance of products or processes, such methods shall be in compliance with the requirements established by SAE ARP9013, 9013/1, 9013/2, 9013/3, 9013/4 or ANSI/ASQC Z1.4 Level II, single sampling as applicable (unless otherwise specified in applicable drawings/specifications), except that in all case the sample sizes shall be AQL 4.0 or higher (i.e., AQL 1.0, .65, etc.) for minor characteristics or AQL 1.5 or higher for major characteristics as defined in the table below, and the criteria for lot acceptance as zero (i.e., C=0).**

**Characteristics that are designated as “critical” or “safety critical” on the UMBRAGROUP’s drawings cannot be sampled but shall be inspected 100%. The supplier shall supply with the CoC and/or the shipping documents of the part the inspection report for all safety critical characteristics reported on the drawing. This will be used to perform the double check of the characteristics at the incoming inspection in UMBRAGROUP.**

**A copy of Suppliers statistical process control plan shall be furnished to UMBRAGROUP upon request.**

<b>Characteristics classification</b>	<b>(Maximum)AQL</b>
<b>Critical / Safety Critical (1A)</b>	<b>100% (no sampling)</b>
<b>Important /Major (1B)</b>	<b>1.5%</b>
<b>Minor</b>	<b>4.0%</b>

Table 1 Sample Size Classification

**Any sampling plans must be submitted to UMBRAGROUP Quality Engineering for review and approval prior to use. Approval shall be obtained in writing from UMBRAGROUP Director of Quality, or designee.**

### 7.3.3 Statistical Process Control

When the supplier elects to use a statistical process control plan this shall be based on the requirements given by AS13006.

### 7.3.4 Operator Self-Verification

**Suppliers may delegate inspection authority and product/process inspection and acceptance to production operators. In such cases, the Supplier’s operator self-verification program shall comply with the requirements of SAE EN/AS9162.**

### 7.3.5 Source Inspection

Supplier’s products or services may be subject to source inspection (SI) by UMBRAGROUP, its representatives or applicable government or regulatory agencies. Source inspection requirements may apply to any and all operations performed by the Supplier or Supplier’s sub-tier sources, including prior to delivery of products to UMBRAGROUP. The Supplier shall provide the necessary access, equipment and resources required to effectively accomplish the source inspection. On site product acceptance by UMBRAGROUP and/or customer personnel does not absolve the Supplier of the responsibility to provide acceptable product, nor shall it preclude subsequent rejections by UMBRAGROUP.

The supplier shall inform adequately in advance (at least 5 days in advance) UMBRAGROUP Quality Engineering when the product that requires a source inspection is ready and available for the customer inspection.

Supplier Funded Source Inspection (SFSI) may be applied because of the poor-quality performance of the supplier (see section 14). In this case the supplier will be charged the additional costs UMBRAGROUP will incur to perform the source inspection.

	<b>QMS PROCEDURE</b>	ID Doc: <b>SQAR</b>
		Rev.: <b>0</b>
	<b>Supplier Quality Assurance Requirements</b>	Page: <b>16 of 30</b>
		Date: <b>09/20/2023</b>

**7.3.6 Delegation of Inspection Authority**

The supplier, which shows the ability to control its manufacturing processes in terms of quality management system requirements and product conformity to requirements, may be delegated by UMBRAGROUP the authority for product inspection on behalf of UMBRAGROUP.

**7.3.7 UMBRAGROUP Receiving Inspection**

All products and services delivered to UMBRAGROUP are subject to Receiving Inspection to ensure compliance with UMBRAGROUP requirements as outlined in the Purchase Order. These requirements may include, but are not limited to, correct quantity, dimensions, material identification, test reports, material/process certifications, Certificates of Conformance, or factory or mill lot identification or traceability. Product failing to pass Receiving Inspection may be returned to the supplier for screening, replacement, credit, or rework. A copy of the rejection paperwork must be returned with reworked material. Nonconforming product detected at receiving inspection will be reflected in the Supplier quality rating.

**7.4 PREVENTIVE MAINTENANCE**

The Supplier should identify key process equipment, provide resources for machine/equipment maintenance activities, and develop an affective planned total preventive maintenance system.

**7.5 SHELF-LIFE CONTROL**

With each delivery of materials or products that have a limited or specified shelf life, the Supplier shall furnish certifications and shipping documents on which shall be recorded data that shows (I) the cure or manufacture date, (II) expiration date or shelf life, (III) temperature limits, (IV) compound number, (V) manufacturing identification, (VI) lot or batch number and, when applicable, any special handling or storage requirements.

Unless otherwise specified in the contract, for all shelf-life limited materials or products delivered to UMBRAGROUP, the remaining shelf life shall be a minimum of 80% of the total shelf life of the material, otherwise the materials or products can be rejected. If exception is taken and approved, it will be noted on the PO. The mixing of date codes within a single order shall be minimized.

Temperature-sensitive materials shall be maintained within the limits prescribed in the applicable document during storage and shipment. Material requiring storage temp below 40° F requires special temperature labels to be attached to the exterior of each package. The label shall reflect the words “temperature sensitive material” and the maximum material storage temperature allowed.

**8 RAW MATERIALS REQUIREMENTS**

**8.1 CONFLICT FREE MINERAL REQUIREMENT**

Minerals from war zones, also known as “Conflict Minerals”, are minerals and related derivatives extracted from Countries where the profit is potentially used to finance, directly or indirectly, armed groups engaged in the civil war, causing social and environmental abuse. Materials under this risk are: tin, tantalum, tungsten and gold.

UMBRA GROUP supports actions to eliminate the use of war zones minerals. UMBRAGROUP is carrying out procedures to assure that minerals used on its products come only from mines and foundries out of conflict zones, or, in case of material coming from mines and foundries inside conflict zones, certificated from third-party authorities as “Conflict free”. In particular:

- UMBRAGROUP suppliers shall respect the above requisites identifying the origin of the minerals and shall transfer to sub-tiers sources the conflict free mineral requirements.
- All Raw Material Suppliers shall provide to UMBRAGROUP a completed “conflict minerals compliance checklist” (available on <http://www.conflictreesourcing.org/>) and/or an equivalent declaration stating the non-use of minerals from war zones.

	<b>QMS PROCEDURE</b>	ID Doc:      SQAR
		Rev.:            0
	<b>Supplier Quality Assurance Requirements</b>	Page:           17 of 30
		Date:            09/20/2023

## 8.2 PROHIBITED MATERIALS (APPLY ONLY TO SUPPLIERS BASED IN EUROPE)

Suppliers shall respect restriction from REACH Regulation (EC) No.1907/2006 for chemical substances. REACH Regulation defines a list of chemical substances that have a restricted use and/or are banned in the UE (more details at <https://echa.europa.eu/it/home>). Supplier shall:

- Quickly inform UMBRAGROUP about the using of substances candidated to be banned published on ECHA website in the section "SVHC Candidate List".
- Not use banned substances by ECHA listed in Annex VII of ECHA's website.
- Not use substances that require ECHA authorization listed in Annex XIV.
- Comply with the article 33 of REACH regulation.
- Be authorized according with the REACH regulation for the use of SVCH or shall purchase products that use or involve in the production process the use of a SVCH only from REACH approved suppliers.

The above requirements apply to all UMBRAGROUP Suppliers and to all products (chemical, mixtures, raw materials, final products and packaging). Substances non-directly used by the Supplier for UMBRAGROUP products, their packaging, stocking, production are not subject to the above requirements. Supplier shall extend those requirements to its sub-tier sources.

## 8.3 VALIDATION OF RAW MATERIAL TEST REPORTS

*When Supplier utilizes test reports to accept purchased raw material, the following requirements apply:*

- Test reports shall be checked 100% against Supplier's requirements and applicable specifications.
- ***Validation test requirement: Supplier shall periodically validate test reports for raw material accepted on the basis of test reports. That validation shall be accomplished by the Supplier or other independent party through periodic, scheduled tests of raw material samples. Schedules for frequency of tests will be established by Supplier based on historical performance of the raw material Supplier.***

***The Supplier shall retain test reports provided by raw material suppliers, as well as Supplier's validation test results as quality records traceable to the conformance of goods.***

## 8.4 RAW MATERIAL LOT CONTROL

***Where the Supplier elects to use more than one lot of raw material, the Supplier shall request permission from the UMBRAGROUP Buyer, ensure, document and furnish positive traceability of each individual product to the raw material certification/test report that represent the raw material from which each of the products was manufactured. Traceability shall be provided by identifying the raw material heat, lot, batch or melt number form the certification/test report on the product and/or on packaging (when used), or the products segregated and identified.***

	<b>QMS PROCEDURE</b>	ID Doc: <b>SQAR</b>
		Rev.: <b>0</b>
	<b>Supplier Quality Assurance Requirements</b>	Page: <b>18 of 30</b>
		Date: <b>09/20/2023</b>

## 9 CHANGE CONTROL

### 9.1 LATEST REVISIONS

The product being manufactured and/or services being performed by the Supplier shall be completed per the latest UMBRAGROUP's revision applicable of the drawing and engineering standards/specifications, unless otherwise indicated on the order. At no time shall other revisions be used other than what is indicated on the purchase orders (or the latest drawing distributed by UMBRAGROUP) without the express written permission of an authorized Buyer of UMBRAGROUP.

### 9.2 CHANGE CONTROL PROCESS

Changes of UMBRAGROUP's approved part design are not allowed.

The Supplier shall have a process to ensure that relevant versions of applicable documents furnished by UMBRAGROUP (as well as those specified of external origin) are available at the point of use.

The Supplier is responsible for the timely review, distribution and implementation of all UMBRAGROUP engineering standards/specifications and changes, in accordance with the schedule required by UMBRAGROUP. Timely review should be as soon as possible.

The Supplier shall maintain a record of the date on which each change is implemented in production. Implementation shall include updated documents.

### 9.3 SUPPLIER CHANGE REQUESTS

Supplier shall not make changes to its manufacturing processes, location, facilities, equipment, material, product design (or any change which may affect product design or function) without written approval from UMBRAGROUP Buyer for:

1. Correction of a discrepancy on a previously submitted part;
2. Any planned changes by the Supplier to the design, process, or manufacturing location, such as:
  - Use of other material than was used in previously approved part or product.
  - Production for new, additional, replacement or modified tools, dies, molds, patterns, etc.
  - Production following upgrade or rearrangement of existing tooling or equipment.
  - Production from tooling and equipment transferred to a different plant site or from an additional plant.
  - Change of Sub-Tier Supplier for Parts, non-equivalent Materials, or Services (e.g. heat treating, plating, etc.).
  - Product produced after tooling has been inactive for production for 12 months or more.
  - Change to test/inspection method.
  - Use of any non-conventional manufacturing methods such as electro-discharge machining (EDM), electro-chemical machining (ECM), laser or abrasive water jet metal cutting, flame spray coating, etc..., unless specifically authorized by the drawing.

	<b>QMS PROCEDURE</b>	ID Doc:    SQAR
		Rev.:        0
	<b>Supplier Quality Assurance Requirements</b>	Page:       19 of 30
		Date:        09/20/2023

## 10 CONTROL OF NONCONFORMING MATERIAL

### 10.1 COST OF THE NON-CONFORMANCE, NONCONFORMANCE NOTIFICATION & PRODUCTS FINAL DISPOSAL

For nonconforming products supplied to UMBRAGROUP, including those that reach an UMBRAGROUP's customer, the Supplier must cover the COSTS (including the NC documental costs) to correct the non-conformance.

When a non-conformance is identified at UMBRAGROUP on purchased products and or services (i.e. machining services, special processes, etc...) and is charged to the Supplier, it will be immediately notified to the Supplier.

The Supplier shall acknowledge UMBRAGROUP within 5 (five) working days from the notification received with the following information:

- Non-conformance acknowledgement.
- containment actions taken.
- acceptance of the responsibility.
- or request for a change of responsibility (change of charge).

If UMBRAGROUP does not receive a change of charge request within the allowed timeframe, the Supplier responsibility will be considered accepted.

The Supplier shall address with a root cause corrective action analysis all non-conformances notified by UMBRAGROUP. When explicitly requested by UMBRAGROUP (i.e., if the non-conformance is repetitive – 3 or more, or if the non-conformance has impact on UMBRAGROUP's customer etc...) the supplier shall provide evidence of the root cause corrective action performed by completing and returning the template QAF10.2.0008 / F-852-002 within 15 (fifteen) working days to UMBRAGROUP.

All nonconforming purchased products scrapped will be sent back to the Supplier at its expense, unless UMBRAGROUP will be otherwise directed by the supplier itself.

Scrapped Nonconforming products on which the supplier has performed only processing operations starting from UMBRAGROUP raw material and/or a UMBRAGROUP semi-finished product (i.e., machining or special processes), dispositioned as scrap by UMBRAGROUP and charged to the supplier, will be segregated for 5 (five) working days from the NC notification to the supplier. During this period, the supplier has the possibility to view and investigate the parts at UMBRAGROUP (or to have the parts sent back for investigation). After the 5 days, parts will be permanently disposed.

### 10.2 NON-CONFORMANCE DISCOVERED BY THE SUPPLIER

#### 10.2.1 Identification, Segregation & Control of Non-conformance parts prior to delivery to UMBRAGROUP

***The Supplier shall document all nonconforming conditions in accordance with the requirements of EN/AS9131 and submit them to UMBRAGROUP Material Review Board (MRB-) for disposition as described above (section 10.2.2)***

Any product found to be nonconforming to the applicable drawing and or process specification requirements during production shall be identified, using a specific card. Card shall report at least:

- Production order number.
- Part description.
- P/N as reported in the drawing.
- Features called out by drawing ("Should Be" condition).
- Detected non-conformance ("Is" condition).

When the supplier scraps products manufactured from raw material or from a semi-finished product that are property of UMBRAGROUP, the Supplier shall report on the CoC, on the shipping document and if applicable on the UMBRAGROUP's work order the amount of products scrapped so that the cost of these products can be charged to the supplier itself.

	<b>QMS PROCEDURE</b>	ID Doc: <b>SQAR</b>
		Rev.: <b>0</b>
	<b>Supplier Quality Assurance Requirements</b>	Page: <b>20 of 30</b>
		Date: <b>09/20/2023</b>

**10.2.2 Concession/Deviation Requests (Supplier MRB Authority Limitations)**

Supplier is NOT authorized to disposition nonconforming product as “use as is” or repair without written authorization from UMBRAGROUP. The supplier shall request a concession to UMBRAGROUP by submitting the template MTF8.4.0025 or F-840-001 Deviation request form reporting the root cause analysis of the non-conformity and evidence of corrective/preventive action adopted.

The Supplier is authorized ONLY to conduct Material Review such as rework (to applicable requirements), scrap or RTV (return to sub-tier sources for rework or replacement).

**ALL SUPPLIERS PROVIDING MAKE TO PRINT WILL NOT BE ABLE TO SUBMIT THE DEVIATION REQUEST FORM FOR MRB APPROVAL.**

Supplier is NOT authorized to deviate from the UMBRAGROUP drawing and/or or process specification without written authorization from UMBRAGROUP. Authorization to produce parts deviating from the drawing requirements shall be coordinated with UMBRAGROUP using the template MTF8.4.0025 or F-840-001 BEFORE the supplier can initiate the production. Any deviation requests received after the production is started will be considered as an abuse of the MRB process and will not be accepted by UMBRAGROUP.

**Supplier shall clearly identify on the Certificates of Conformity when parts are accepted or rejected through a Concession/Deviation Request when these are delivered to UMBRAGROUP.**

Supplier shall not knowingly ship product that deviates from the drawing, specification limits, or design intent without prior written authorization of UMBRAGROUP.

**10.2.3 Notice of Escapement**

When the supplier has determined that nonconforming products have been delivered to UMBRAGROUP, the supplier shall notify UMBRAGROUP Buyer or Supplier Quality within 24 (twenty-four) hours of the initial discovery. The supplier shall use receipt acknowledge e-mail or other positive notification method. The notification shall include the following information:

- Supplier name.
- UMBRAGROUP contract number.
- Part number and description.
- Affected quantity and serial numbers (if known).
- Dates delivered (if known).
- Brief description of the nonconforming condition.

The initial notification shall be followed by a formal “Disclosure Letter” delivered to the UMBRAGROUP buyer within 5 (five) working days of the initial notification. The Disclosure shall include the following information:

- Complete description of the nonconforming condition(s).
- The affected quantity of the products (including serial numbers when applicable) and dates delivered to UMBRAGROUP.
- Potential effect of the non-conformance on the performance, reliability, safety and/or usability of the product(s) if known.
- Recommendations for UMBRAGROUP action including for products that UMBRAGROUP may have already delivered to its customers.
- Immediate action taken by supplier to contain the non-conformance and nonconforming products.
- Root cause analysis of the nonconforming condition.
- Root cause corrective actions plan and schedule.
- The plan and schedule for verifying the effectiveness of the corrective actions.

If the above points are under investigation and incomplete, the supplier may request, from UMBRAGROUP buyer, authority to submit an interim disclosure letter. The interim letter shall include as much information as available and identify the due date for completion of the investigation and the date of the final disclosure letter that includes all above data will be submitted to UMBRAGROUP. UMBRAGROUP reserves the right to participate in the nonconforming product investigation at the facilities of the supplier or its sub-tier sources.

	<b>QMS PROCEDURE</b>	ID Doc: <b>SQAR</b>
		Rev.: <b>0</b>
	<b>Supplier Quality Assurance Requirements</b>	Page: <b>21 of 30</b>
		Date: <b>09/20/2023</b>

## **11 PRODUCT PRESERVATION, PACKAGING, LABELLING**

Preservation, packaging, labelling, and shipping methods must comply with common industry practices and UMBRAGROUP requirements specified on the contract (where applicable)

### **11.1 PRESERVATION**

The Supplier is required to provide special handling to prevent part-to-part contact and other damage to the parts and to individually protective package the parts prior to return to UMBRAGROUP. Failure to comply with this clause may result in a UMBRAGROUP rejection and subsequent back charges to the Supplier for rework and or scrapping of parts, if it is determined that the Supplier is responsible due to negligence during packing and/or handling.

### **11.2 PACKAGING**

The Supplier shall maintain proper control of packaging and shipping operations to assure that items are:

- Shipped in correct quantities and accompanied by the proper certifications and other related paperwork.
- Properly preserved and packaged to protect items from corrosion, contamination and damage in transit.

For those Supplier's providing a service to UMBRAGROUP using UMBRAGROUP supplied products and or materials, and such products and or materials are provided to the Supplier by UMBRAGROUP in dedicated and reusable containers, the Supplier shall utilize these containers when returning items to UMBRAGROUP after the Supplier's services have been performed.

Boxes or containers, as applicable, should be selected to the extent necessary to provide protection from physical and environmental damage during shipping and handling. Cushioning materials shall be applied, as required, to protect and to restrict movement of the item(s). Expendable materials and packaging must meet local and national standards for safe disposal and/or recycling.

### **11.3 LABELLING**

All packages and paperwork shall be marked with UMBRAGROUP part number, Purchase Order number, line number where applicable, date, suppliers name and lot number where applicable.

### **11.4 DELIVERY**

The Supplier shall systematically inform UMBRAGROUP of any delay in delivering product and provide new dispatch date. The Supplier is responsible for additional transport costs due to delays.

## **12 PRODUCT CERTIFICATIONS**

### **12.1 Certificate of conformance (CoC)**

***A signed and dated CoC by the Suppliers head of quality or company officer (or their authorized delegate) attesting that all products and/or services delivered are in compliance with all contract requirements shall be furnished with each shipment to UMBRAGROUP. All CoC's must be in English language and may be in electronic format with electronic signatures. All signatures or signature blocks must clearly show title of the signatory. The CoC shall include:***

- a. Name of manufacturer.***
- b. Manufacturers address.***
- c. UMBRAGROUP Purchase Order Number and if applicable the release (line) number.***
- d. Item name and Part Number.***
- e. Quantity of parts shipped.***
- f. identification number(s) (i.e., Lot Number, Serial Number).***
- g. Applicable Drawing/Specification number(s) and Revision Level.***
- h. Authorized Waiver (Deviation) or Concession Request.***

	<b>QMS PROCEDURE</b>	ID Doc: SQAR
		Rev.: 0
	<b>Supplier Quality Assurance Requirements</b>	Page: 22 of 30
		Date: 09/20/2023

i. NDT test report identification number(s).

j. The Certificate of Conformance shall include the following statement (or similar):

**"We hereby certify that the Materials/Products/Services furnished in this order were made or performed in accordance with and conform to the applicable specification(s) and/or drawing(s) as stipulated in the UMBRAGROUP Purchase Order."**

k. The signature of the provider authorized representative.

**NOTE: A Packing List or a Certificate of Analysis containing the information and statements noted in a. through i. above may substitute for The Certificate of Conformance.**

**Unless otherwise specified by the contract/PO parts shall have no FAA PMA markings on them or on the associated documentation and shall not be sold with an FAA 8130-3 form. This also applies to the "constituent" parts thereof and the supplier's sub-tier supply chain.**

### 12.2 Raw Material Certificate of Analysis

All metallic and non-metallic raw materials shall be accompanied by a certificate of analysis 3.1 per EN/AS10204.

### 12.3 Special Processes Certificate

In addition to the certification listed in section 12.1, all special process suppliers shall include in the CoC the following information with each shipment:

- a. Process identification.
- b. Process specification number and revision level.
- c. Identification of the process method used as the acceptance criteria document.  
and shall include in the certification package evidence of product acceptance including applicable reports. All certifications must reflect applicable document revision.

## 13 CONTINUAL IMPROVEMENT & CA REQUESTS

**Supplier should define a process for continual improvement. It is recommended the use of ISO 9004, including Annex B as guideline. A copy of the Supplier's continual improvement program shall be furnished to UMBRAGROUP upon request.**

UMBRA GROUP may issue a request for a Corrective Action to the Supplier when nonconforming material, components, or assemblies are found. When a formal reply is requested, the supplier should submit the Corrective Action Report using the QAF10.2.0008 / F-852-002 template, or other convenient media of equivalent content, within the timeline reported in table 2 and documenting the root cause using the guidelines reported in Annex 1.

Required Actions	Timeline (From initial UMBRAGROUP notification)
Supplier shall promptly acknowledge receipt of notification and communicate to UMBRAGROUP the immediate containment actions to be taken	Within 5 working days
Supplier shall provide an update of the containment plan to protect UMBRAGROUP (using the form QAF10.2.0008 / F-852-002) during interim period. This update must include: <ul style="list-style-type: none"> <li>• Confirmation that Supplier has identified all suspected product in process, in stock, in transit, and potentially at any UMBRAGROUP site by lot number, UMBRAGROUP contract number, and quantity.</li> </ul>	Within 5 working days

	<b>QMS PROCEDURE</b>	ID Doc: <b>SQAR</b>
		Rev.: <b>0</b>
	<b>Supplier Quality Assurance Requirements</b>	Page: <b>23 of 30</b>
		Date: <b>09/20/2023</b>

<ul style="list-style-type: none"> <li>Additional specific containment actions needed to be taken by the Supplier and/or UMBRAGROUP.</li> </ul>	
Submit the completed Corrective Action Report (QAF10.2.0008 / F-852-002) indicating the permanent actions taken, or to be taken, to prevent recurrence of the same problem, to prevent the occurrence of similar problems, and the applicable effectivity dates.	Within 15 working days

*Table 2: corrective action request process*

## 14 SUPPLIER PERFORMANCES

UMBRA GROUP has developed KPIs parameters to measure supplier's performances in terms of quality and on time delivery of the products and services delivered. Supplier performance results are distributed periodically to the supply chain by UMBRA GROUP. Failure of the supplier to meet the performance targets communicated by UMBRA GROUP will result in an "escalation" process to recover the supplier performance:

- Initially the supplier will be required to develop a Quality/Delivery/Performance Improvement Plan shared with UMBRA GROUP
- Suppliers with extremely negative chronic performances, or suppliers that have demonstrated to be unable to promptly develop, put in place and accomplish an effective QIP, will be moved to a probation status. During the probation status, it will not be involved in new bid, it will be removed from the product delegation program and Supplier Founded Source Inspection will be established where possible and UMBRA GROUP will consider alternative sources when placing new orders (where/when possible).
- Finally, Suppliers on probation who are not able a) to develop a QIP in a reasonable amount of time or b) to give confidence to UMBRA GROUP to be able to meet the probation exit criteria or c) to show management commitment in achieving the required improvement (including necessary company investment), will be withdrawn from UMBRA GROUP's approved suppliers list.

## 15 SPECIAL REQUIREMENTS

### 15.1 SPECIAL REQUIREMENTS FOR SUPPLIERS OF ELECTRONIC DEVICES, COMPONENTS AND ASSEMBLIES (according to UMBRA GROUP blueprints and/or UMBRA GROUP technical specifications)

#### 15.1.1 Control plan for electrostatic discharge (ESD)

Before beginning production operations, the supplier of electronic devices sensitive to electrical voltage, (including electronic components, sub-assemblies and assemblies) must establish, implement **and present to UMBRA GROUP for verification and approval, through an audit preferably at the production site,** a control plan of the production and handling areas for protection from Electrostatic Discharge (ESD), in accordance to the requirements of IEC 61340-5-1 or MIL-STD-1686 or ANSI/ESD S20.20.

Devices identified as being subject to electrostatic discharge must be packaged and labelled in accordance with EN100015-1 or MIL-STD-1686 or ANSI/ESD S20.20 in antistatic containers.

The external packaging of ESD sensitive components and products must have clear warning labels in accordance with ANSI/ESD S-8.1

#### 15.1.2 Electronic Products for A&D Application - General Requirements

***The materials, methods and acceptance criteria for the production and assembly of electrical and electronic devices and boards must comply with the requirements of IPC-A-610 "Acceptability of Electronic Assemblies" and IPC/JSTD-001 "Requirement for Soldered Electronic Assemblies" for Class 3: High Performance aeronautical electronic products.***

#### 15.1.3 Electronic Products for Industrial Application - General Requirements

The materials, methods and acceptance criteria for the production and assembly of electrical and electronic devices and boards must comply with the requirements of IPC-A-610 "Applicability of Electronic Assemblies" and IPC/EIA JSTD-

	<b>QMS PROCEDURE</b>	ID Doc: <b>SQAR</b>
		Rev.: <b>0</b>
	<b>Supplier Quality Assurance Requirements</b>	Page: <b>24 of 30</b>
		Date: <b>09/20/2023</b>

001 "Requirement for Soldered Electronic Assemblies" for Class 2: Electronic products for industrial applications. The products used for the execution of conformal coating must conform to Class 2 (or higher) of IPC-CC-830.

The tools used, the wires and requirements for crimping must conform to MIL-DTL-22520G.

**15.1.4 Certification and inspection tests for electronic devices**

Electronic devices assembled according to UMBRAGROUP blueprints and/or UMBRAGROUP technical specifications are subject to the FAI/PPAP requirements specified in section 6.

With each shipment of electronic devices or components, the supplier must send the certification documentation of production traceability and coating processes (e.g. conformal coating) to UMBRAGROUP.

"Documented inspections of electrical and electronic devices", shall include:

- a) Applicable specifications and their revisions.
- b) Part number (P/N) and its revision.
- c) Lot and date of manufacture.
- d) Quantity shipped.
- e) Checks performed.

**15.1.5 Identification of electronic devices**

Each electronic device or component must be identified in accordance with the applicable specifications by a lot number needed to identify and track its production and applied processes.

**15.1.6 Inspection of printed circuit boards (PCB)**

With each shipment, suppliers of printed circuit boards (PCB) must provide the following:

- a) A sample of the printed circuit board for each printed lot. The sample can be examined by the supplier in case of defects and non-compliance.
- b) Rigid printed circuits must comply with the quality requirements of IPC-6012, according to audits and inspections required for group A and group B.
- c) Flexible printed circuits must comply with the quality requirements of IPC-6013, according to audits and inspections required for group A and group B.
- d) A certificate of inspection and testing of electrical continuity.

**15.1.7 Components Obsolescence Management**

The supplier must develop, document and implement a process for managing the electronic components including all aspects of the product life cycle, from design to maintenance, including the selection of components, application, standardization and obsolescence management.

Supplier shall perform a systematic check of production continuity for all components potentially at obsolescence risk.

The Management plan of the supplier must include the following activities:

- a) If a component becomes obsolete or cannot be procured, the supplier management process for obsolete components must include a provision for the assembly of alternative parts or equivalent parts, before the end of its commercial availability.
- b) When obsolete components are no longer available, the parts selected to replace them must be verified according to appropriate criteria in terms of shape, function and interchangeability (form-fit-function), to ensure the performance and quality of the original parts. The documentation and verification tests must be properly documented and promptly communicated to UMBRAGROUP.
- c) When assembly of alternative components requires modification of the layout of the printed circuit board (PCB), approval by UMBRAGROUP must be requested.
- d) The duration of market availability of a component needs to be considered properly, and the supplier must promptly notify UMBRAGROUP of his intent to proceed with the replacement of components, for potential approval.

	<b>QMS PROCEDURE</b>	ID Doc: <b>SQAR</b>
		Rev.: <b>0</b>
	<b>Supplier Quality Assurance Requirements</b>	Page: <b>25 of 30</b>
		Date: <b>09/20/2023</b>

- e) When the alternative parts cannot meet form-fit-function requirements, the supplier must promptly notify UMBRAGROUP of his intent and implement a detailed plan for the analysis, testing and inspections necessary to demonstrate equivalence with the original parts. The tests must be documented and recorded.
- f) The report of analysis by the supplier must be sent to UMBRAGROUP and must include the following points:
  - 1) Reasons for replacement.
  - 2) Components that need to be replaced in Critical Operations.
  - 3) List of equipment in which the new component will be used and its number.
  - 4) Part number (P/N) of the existing component.
  - 5) Evaluation of the Temperature range of the existing component.
  - 6) Quality specifications or reference standards applicable to the existing component.
  - 7) Part Number (P/N) of the New component.
  - 8) Evaluation of the Temperature range of the New component.
  - 9) Quality specifications or reference regulations applicable to the New component.
  - 10) Analysis of possible effects of the new component on the reliability and safety of the equipment in which it is to be assembled.
  - 11) Description of the analyses and inspection tests results, showing the reliability of the new component under operating conditions.
- g) For a discontinued component, in case of which obsolescence makes the component irreplaceable, the supplier must notify UMBRAGROUP of the circumstances that resulted in the irreplaceable component. UMBRAGROUP and the supplier must work together to document and promptly inform the end customer about the imminent problem of obsolescence and discontinuity of product supply.

**15.2 SPECIAL REQUIREMENTS FOR SOFTWARE SUPPLIERS**

The supplier shall develop, document, and implement a counterfeit prevention plan to prevent malicious logic from being imbedded into parts or devices (when products or devices with code is supplied). This shall also apply when software only is supplied. Malicious logic is defined as any extraneous code that has been included in hardware, firmware, or software whose purpose is to perform some harmful or otherwise unauthorized action (e.g. logic bomb, Trojan horse, virus, worm, etc.).

**Appendix A – Terms and Conditions Applicable to All Purchase Orders**

UMBRA GROUP.com/suppliers

**Appendix B – Terms and Conditions Applicable to Defense Purchase Orders**

The following clauses of the Federal Acquisition Regulations (FAR) and supplements thereto, are specifically incorporated herein by reference and the seller agrees to be bound by these clauses. Where necessary to derive proper meaning, the terms “Government “ and “Contracting Officer” shall mean “Linear Motion, LLC” or “Buyer”, and the term “Contractor” shall mean “Seller”. The FAR and DFARS flow-down clauses should be effective as of the date of the purchase order. The Guidance lists only current effective FAR and DFARS clauses that require the prime contractor to include terms into its subcontracts. However, the contractor must incorporate discontinued and/or prior versions of the FAR, and DFARS clauses (other than the CAS clause) not listed, which are contained in its prime contracts, into its subcontracts to the extent required by such clauses. The contractor should have a process in place to insure compliance with these flow-down requirements.

Current versions of FAR and DFARS clauses may be found at <https://www.acquisition.gov/browse/index/far>

**ANNEX 1**

**PROBLEM SOLVING & ROOT CAUSE CORRECTIVE ACTION (RCCA) GUIDELINES**

Supplier should use a closed-loop corrective action process whenever a problem is encountered internally or upon notification from UMBRAGROUP. For example:

1	Describe the problem	State what the problem “is” and “is not” with respect to what, where, when, who, how, and how many. Use quantitative terms.
2	Use a Team approach	Consult and coordinate with relevant stakeholders.
3	Apply Containment	Immediately contain any suspect product to protect UMBRAGROUP and its customers.
4	Root Cause Analysis	Identify potential causes, analyze causes for a failure mode, validate root cause(s), and identify solutions.
5	Implement Permanent Corrective action	Implement solution. Update applicable FMEA, control plan and work instructions.
6	Verify Effectiveness of Corrective action	Use check sheets, auditing, sampling, and/or control plan to monitor process performance for effectiveness and sustained improvement.
7	Implement Preventive action	Implement changes to prevent the same type of error from occurring in similar products/processes. Update applicable documents.
8	Management Support	Review, approve, and support. Provide resources and team recognition.

*Table 3: corrective action process*

For additional guidance on problem solving methods, tools, training, and related references, refer to AIAG document CQI-10.

	<b>QMS PROCEDURE</b>	ID Doc: <b>SQAR</b>
		Rev.: <b>0</b>
	<b>Supplier Quality Assurance Requirements</b>	Page: <b>30 of 30</b>
		Date: <b>09/20/2023</b>

When documenting the root cause, the Supplier shall include the underlying reasons:

- a) Why the specific nonconforming condition or incident occurred.
- b) Why it was not detected by the Supplier quality control.
- c) Why the related process, from a systemic point of view, allowed the nonconformance (and potentially other similar) to occur.

The Supplier should apply the following criteria to determine whether the underlying root cause has been identified:

- 1. It initiates and causes the event you are seeking to explain.
- 2. It is directly controllable.
- 3. The elimination of that root cause will result in the elimination or reduction of the problem.

Statements from the Supplier indicating that the corrective action is to alert or retrain the operator, and/or increase inspection, alone, are NOT acceptable corrective actions. These kinds of actions would be considered insufficient and not address the real underlying root cause(s) of why the Supplier's policy, instructions, process, procedure, and/or system allowed the problem to develop and occur without being detected by quality control.

**ANNEX 2**

**SUPPLIER SERIALIZATION FORMAT**

Vendor Code	Method of Serialization
XXXXXX	XXXXXX01
XXXXXX	XXXXXX00000001

*Table 4 Serialization Format*
